By Bruce Croft, Donald Metzler, Trevor Strohman : Search Engines: Information Retrieval in Practice

consider to be the most important alternatives to implementing search engine ranking algorithms and the retrieval models they are based 13 searchengines this book provides an overview of the important issues in information retrieval and how those issues affect the design and implementation of search engines Search Engines: Information Retrieval in Practice:

1 of 1 review helpful Intensely Written By N Tatjana C Versaggi This is a textbook I use in information systems graduate school It s the kind of book you open and suddenly feel sleepy The information is well organized and there is an online website but I often have to go looking elsewhere for less wordy explanations AN economy of words is not

the books strong suit I am however learning a lot especially throwing Search Engines Information Retrieval in Practice is ideal for introductory information retrieval courses at the undergraduate and graduate level in computer science information science and computer engineering departments It is also a valuable tool for search engine and information retrieval professionals nbsp Written by a leader in the field o From the Back Cover KEY BENEFIT Written by a leader in the field of information retrieval this text provides the background and tools needed to evaluate compare and modify search engines KEY TOPICS Coverage of the underlying
