2 of 2 review helpful Great Graphic Textbook By Stephanie Willen Brown I love it for two reasons It s graphic cute and trendy It s accurate thorough and humorous The librarian uses chairs to illustrate why subject headings can be helpful adding that chairs are also seats and are within the category of furniture She illustrates Boolean operators with Venn diagrams by talking about a search for Pir Every day researchers face an onslaught of irrelevant inaccurate and sometimes insidious information While new technologies provide powerful tools for accessing knowledge not all information is created equal Valuable information may be tucked away on a shelf buried on the hundredth page of search results or hidden behind digital barriers With so many obstacles to effective research it is vital that higher education students master the art of inquiry A useful guide to developing an essential skill for students
