From Sellet Frederic : Archaeology and Ethnoarchaeology of Mobility in archaeology lithic analysis is the analysis of stone tools and other chipped stone artifacts using basic scientific techniques at its most basic level lithic anthropology offers the opportunity to study human existence in the present and the past and to explore how and why

humans vary in their behaviors cultures and biology Archaeology and Ethnoarchaeology of Mobility:

Humans are unique in their ability to inhabit an immense range of physical habitats This capacity partially results from the need to cope with variation in spatial and temporal distributions of critical resources Yet factors other than the search for food often impacts relocation Information gathering raw material collection social networking trade and mate search each present mobility needs that compete with daily food searches While physical evidence might ldquo A no nonsense book which does exactly what it says on the cover The twelve contributions are equally divided into two sections looking at ethnoarchaeological mobility and archaeological studies of mobility with case studies ranging from Australia
